Cardkeep™ S1953

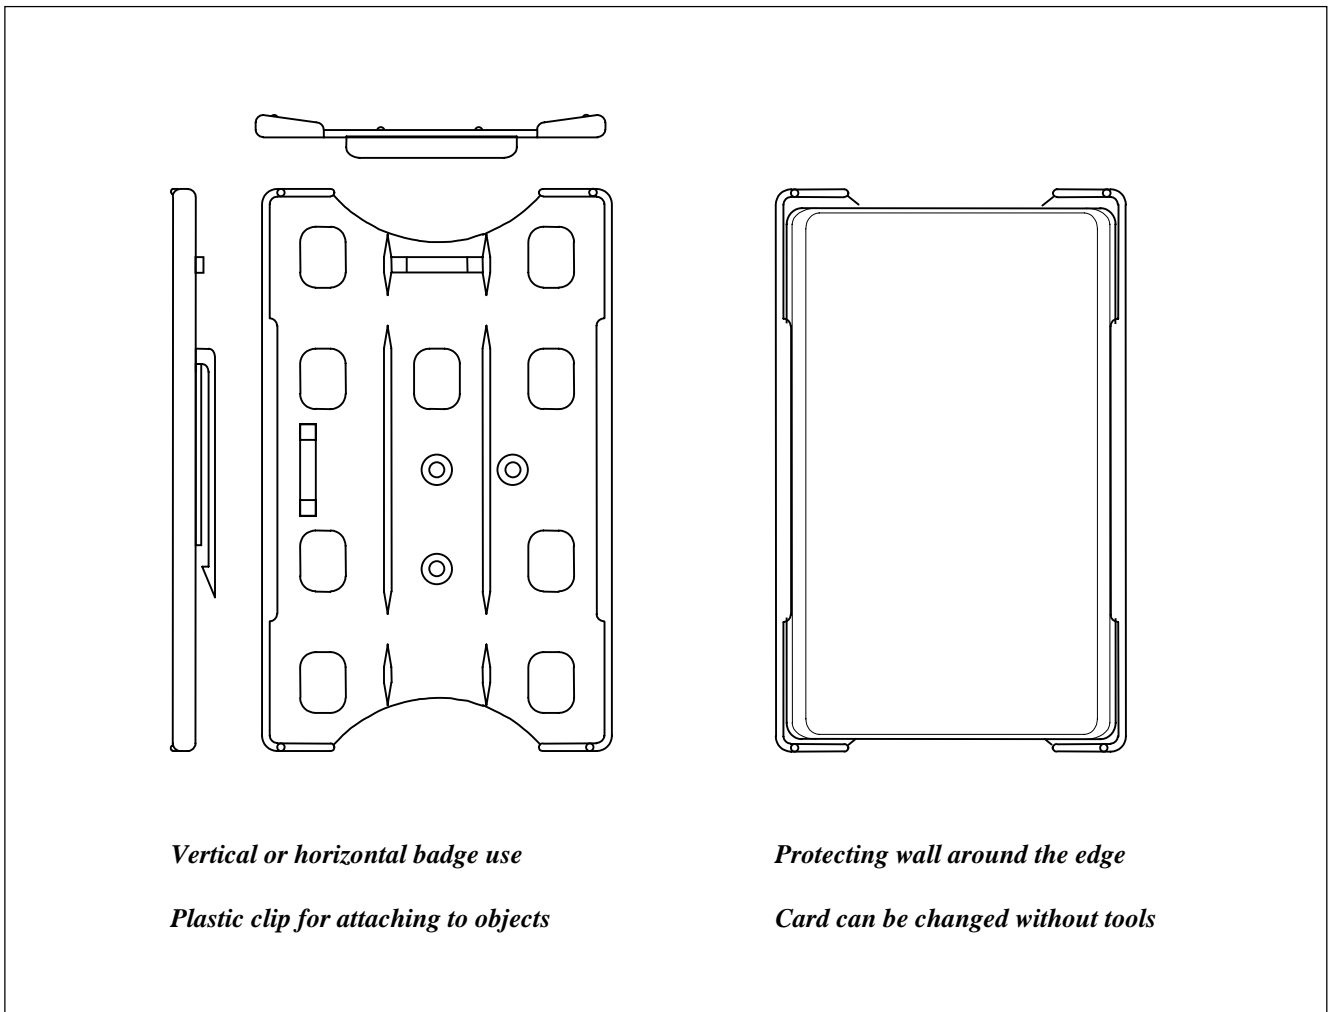

Card holder for general use

Cardkeep S1953 is recommended for attaching CONFIDENT card tags to various objects. It can function either as a neat badge for personal identification, or as a snap in holder for tagging of various materials.

A plastic clip is suitable for attaching on clothes and other soft materials. The clip allows rotation either for vertical or horizontal orientation.

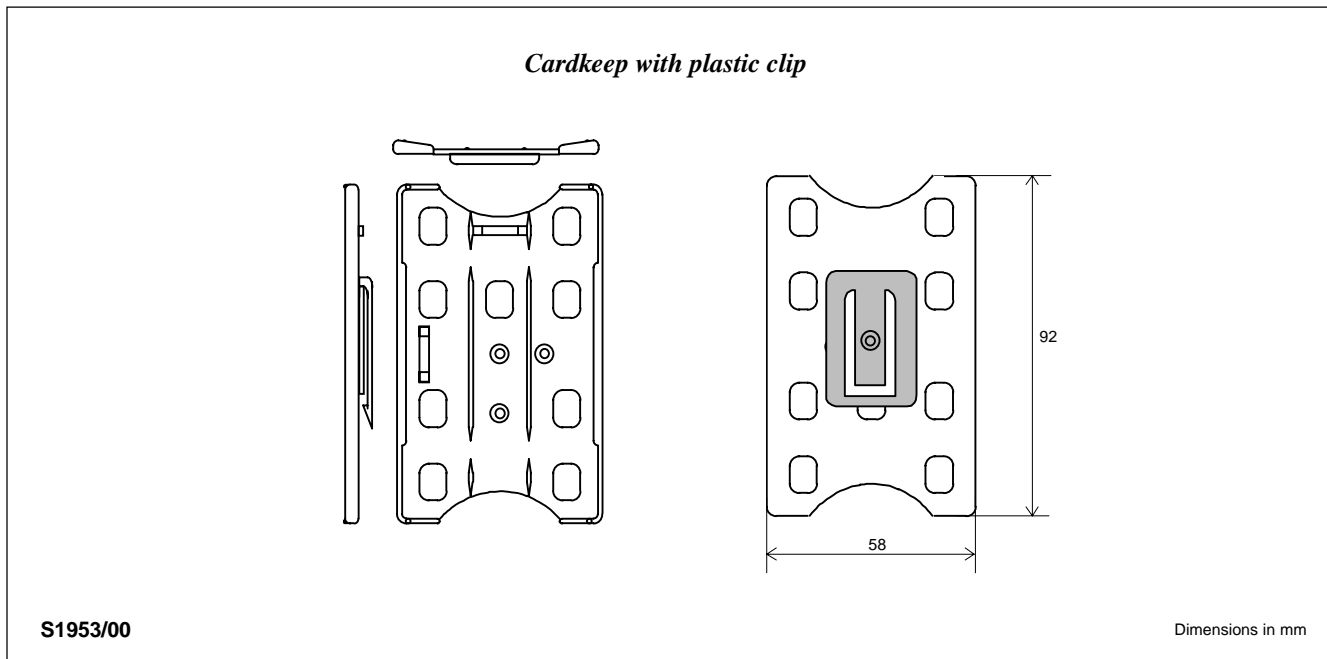

Cardkeep 1953 is designed so that a card can easily be slid into it, or be removed, without special tools.

A strong design with a plastic wall along the edge prevents the card from bending and other mechanical damage. This wall also ensures that it stays safely in the holder, even if mechanical shocks should occur.
